

TECHNICAL DATA

Sensor element: NTC 10 kOhm
Temperature range: -10° to +80°C
Cable length: 5 m

MATERIAL

Sensor bulb and cable: PVC

CONNECTORS ON THE MODULAR CONTACT

1	NTC
2	NTC
3	SGND
4	SGND

FUNCTION

SafeCO2-Temp has a thermistor that changes its resistance depending on the ambient temperature. It is intended to measure temperature in water or in air.

ASSEMBLE

Lower one SafeCO2-Temp in the coolers water container and place the other one under the beer pipe insulation. Handle the temperature sensors with great care to preserve the water tightness.

CONNECTION

SafeCO2-Temp has five meters cable and a modular contact, which is to be connected to "NTC1" and "NTC2" in SafeCO2-Maxi's connection box.

MAINTENANCE

SafeCO2-Temp is maintenance free.

ORDER EXAMPLE

Item No.
SafeCO2-Temp

TEMPERATURE / RESISTANCE TABLE

°C	ohm
-5	42,280
0	32,613
5	25,375
10	19,900
15	15,719
20	12,500
25	10,000
