

TECHNICAL DATA

Dimensions (LxWxD):	259 x 30 x 69mm / 10,20"x 1,18" x 2,72"
Weight:	209 g / 7,37 oz
Material:	Steel
Country of origin:	SE

FUNCTION

The LogiCO2 Protection Bar is a robust and durable safety accessory designed to protect gas sensors and other critical equipment from accidental impact in high-traffic areas. Its sturdy construction ensures longevity and reliability, reducing the risk of damage in industrial, commercial, and hospitality environments.

APPLICATION AREAS

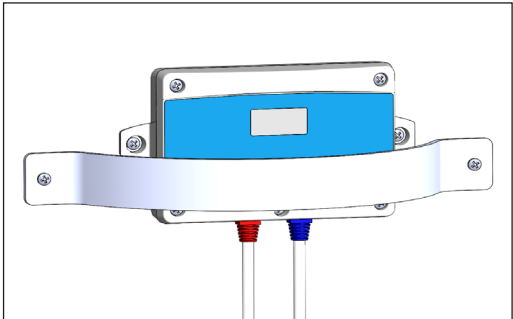

- Restaurants & Bars
- Breweries & Wineries
- Industrial Facilities
- Laboratories
- Cold Storage Rooms
- Supermarkets

FEATURES

- **Heavy-Duty Construction:** Made from steel for superior strength and durability.
- **Optimized Design:** Allows for easy installation and maintenance while ensuring optimal protection.
- **Universal Compatibility:** Designed to fit and protect LogiCO2 gas sensors and other sensitive equipment.

INSTALLATION

The Protection bar shall be mounted securely to a solid surface using provided hardware. Ensure that the bar is positioned to protect gas sensors without obstructing their operation.

MAINTENANCE

Periodic inspections are recommended to ensure integrity and security.

ORDERING EXAMPLE

Item code	Description
0182	Protection Bar for LogiCO2 Safety System
